

Join Optricity for its fifth annual OptiShop™, a workshop specializing in supporting and enhancing the performance of an elite class of slotting enthusiasts. Receive slotting tips, delve into slotting strategies and tactics, exchange information with your peers, and be sure you are utilizing OptiSlot at full capacity to continue the advancement of your warehousing operations.

This workshop will provide the chance for new users to build a project from scratch and optimize a warehouse area. Building a solid foundation using the core functionality of OptiSlot will be the primary focus for beginning and early stage users looking to shore up their OptiSlot skillset. Veteran users will explore advanced functionality and theory. All users will learn the best techniques to fortify their slotting to receive continuous benefit. Address challenges openly with peers and Optricity engineers and discover new approaches to implement the best slotting solution.

Meet with the Optricity team for face-to-face instruction and learn how to best address, and avoid, some of the top issues our engineers see daily. Strategize and maintain a slotting solution game plan that will fit your day to day needs and ensure success for current and upcoming goals and objectives. Finish up the workshop with a friendly competition at this year's Annual Slotting Olympics, plus a sneak peek at what Optricity has in store to shape the future of warehousing. On behalf of the Optricity team, we look forward to seeing you soon!

Workshop Advantages:

- Slotting domain and technology experts on-hand to address your toughest slotting challenges
- Network with other OptiSlot users across industries and review goals and objectives for cross-industry feedback
- Gain insight into a variety of slotting techniques to build a customized strategy for success
- Build a refined slotting maintenance strategy that will lead to continuous benefit all year long
- Get acquainted with the latest build of OptiSlot, including the latest hot topic function: the Replexer™
- Get your most challenging questions answered by leading experts in a comfortable, collaborative atmosphere
- A copy of OptiSlot is not a prerequisite for attendance. Bring your own computer and we'll load a copy for use during OptiShop. We'll provide the data sets to be used during instructional sessions**

This year's agenda will feature:

- Slotting Tips
- Slotting Theory
- Goals & Constraints
- KPIs & Metrics
- Slotting Maintenance Strategies
- Addressing Goods-to-Person
- Advanced Period-in-Pick
- Case Studies
- Slotting Olympics
- & More! (full program and descriptions coming soon!)
